

The background of the slide is a panoramic view of Zurich, Switzerland. In the foreground, the red-tiled roofs of city buildings are visible. A prominent feature is the large, brown dome of the Grossmünster church. Beyond the city, the calm waters of Lake Zurich stretch towards the horizon, with the city of Zurich visible on the opposite shore. In the far background, rolling green hills and mountains are visible under a clear sky.

Semester Project: Real-Time Ultrasound Imaging Feedback

Lilian Laporte

30th January 2024, Zürich

Results

Influence on Microbubbles path

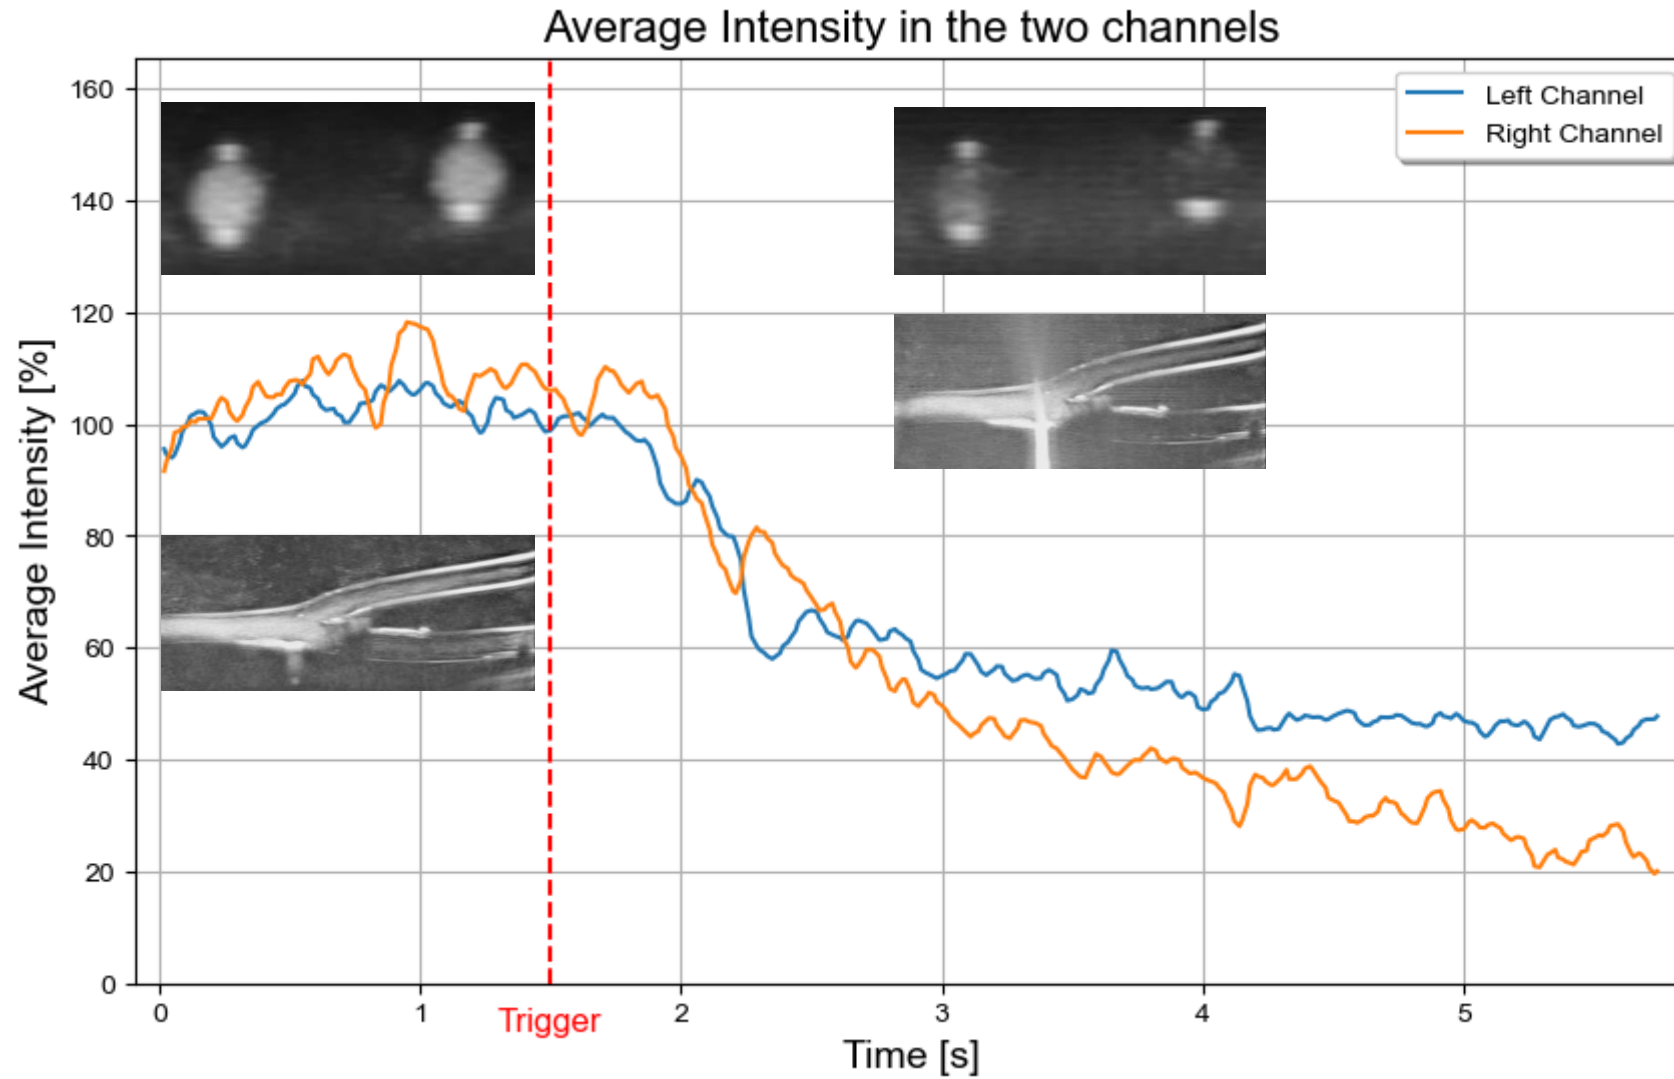

Trigger: 7V

Trigger: 15V

Results

Conclusion

- New manner of making channels for Ultrasound Imaging
- Get a Real-Time Feedback
- Tracker returning the position (and velocity) of the microbubbles
- Influence on the direction of the microbubbles with HIFU

Conclusion

Futur Work:

- Use the octagon idea with HIFO
- Try more complex new channels
- Try to make other transducers working

Thank you
